ABOUT US

Profile

SYMAIR, headquartered in Xi'an, China, with production facilities in Guangdong, is a solutions provider for mobile communication coverage and a manufacturer of related products.

Leveraging over a decade of industry experience, SYMAIR has developed four major solutions: passive DAS, RF feeder cabling, panel antennas, and RF ceramic filters, assisting customers in reducing procurement costs, enhancing network quality, and optimizing profit margins.

Introduction

SYMAIR is customer-oriented and prioritizes product quality, earning the trust and support of an increasing number of domestic and international customers. By optimizing supply chain costs, enhancing delivery speed, and offering flexible cooperation terms, SYMAIR strives to support customers in achieving maximum business value.

50+

Employees

All the employees are experienced and well-trained.

10+

Engineers

Including QC engineers, R&D engineers.

2+

Facilities

For manufacturing of passive components and RF ceramic filters.

5+

Millions

Of overseas trading revenue.

Antennas

Ceramic
Filters

SYMAIR ainly provides customers with solutions and products including passive DAS, outdoor site material, base station panel antennas and RF ceramic filters. SYMAIR has a factory and warehouse in Dongguan, China, and the factory has passed the ISO9001 quality system certification.

Cellular Site Solution

General

SYMAIR's Cellular Site Solution primarily offers a one-stop solution for RF connectivity and construction of outdoor macro tower/roof sites, encompassing items such as coaxial cables, RF connectors, RF jumpers, grounding cards, and engineering accessories.

SYMAIR integrates supply chain resources to provide customers with one-stop solutions, effectively reducing procurement costs and improving procurement efficiency.

Related Products

- RF Coaxial Feeder Cable
- Connector And Adapter
- RF Jumper Cable
- Grounding Kit
- Sealing Mastic
- Insulating Tape
- AISG Cable
- Cable Tie

Customers

SYMAIR's global customers include system integrators, regional agents, telecom operators, and equipment manufacturers. We have long-term customer relationships in Southeast Asia, the Middle East, Japan, and South America.

Scenarios

Cellular Site Solution primarily targets mobile communication engineering construction companies worldwide, offering materials such as RF connectors, waterproof insulation, grounding cables, AISG control cables, and more.

Product Categories

SYMAIR's Cellular Site Solution primarily encompasses eight categories of products: coaxial feeders, RF connection adapters, RF jumpers, grounding kits, waterproof sealant, insulation tape, AISG control cables, and cable ties.

Weatherproof Sealants

SYMAIR butyl rubber tape, crafted from premium nitrile rubber, is customizable in size and ideal for waterproof sealing and insulation of outdoor connectors.

Insulation Tapes

SYMAIR insulation tape is available in various widths, thicknesses, and lengths, catering to insulation needs in RF connection construction.

AISG Control Cables

The AISG control line facilitates the connection between RET and RRU, compatible with interfaces from major OEMs like Ericsson, Huawei, Nokia.

Cable Ties

The self-locking cable tie, crafted from high-quality 304 stainless steel, finds extensive application in the installation and fixation of cables and components.

Quality First, Customer First

Product quality is the cornerstone of SYMAIR and the fundamental reason why customers choose SYMAIR. The minimum warranty period can be 2 years after delivery.

Customer requirements are the driving force of SYMAIR's growth. Only when we achieve success for our customers can we achieve success for ourselves.

RF Connectors

SYMAIR provides a complete range of passive DAS components including RF power splitters and RF directional Couplers.

RF Jumper Cables

SYMAIR offers comprehensive ranges of various power handling and connector interface for RF dummy loads and attenuators.

RF Feeder Cables

For indoor DAS deployments, SYMAIR provides omni ceiling and indoor panel antennas supporting MIMO applications, with frequency band up to 6000 MHz.

Grounding Kits

The SYMAIR grounding wire, crafted from high-quality copper, is apt for outer conductor grounding of various size of feeder cables.

WHY US —

1 Day

Fast quotation: 1 day for standard products.

2 Weeks

Fast delivery: 2 weeks for standard products.

2 Years

Long warranty: Minimum 2 years.

Factory Supply

Factory supply for high-tech products.

Cost Competitive

Guaranteed best prices on the same quality level.

Flexible Trading Terms

Flexible and reciprocal agency distribution policy.
